p24, Exercises 1.4.3: in (ii), missing $\mathrm{d}x$ in $\int |\varphi - q| < \epsilon$ and Exercise A.2.1 should be **Lemma A.2.1**; seems showing an answer in the second (iii), whithin which it should be "… a function that is 0 **on** $(a_{j-1}, a_j)^c$, c_j on $(a_{j-1+\delta}, a_j - \delta)$ …".
